

# SETH JACKSON

Web & Digital Media Professional · Creative Project Manager · Full-Stack Developer

---

Molalla, OR · (971) 359-5120 · [mrjackson@sethshows.com](mailto:mrjackson@sethshows.com) · [linkedin.com/in/seth-jackson](https://linkedin.com/in/seth-jackson) · [github.com/mrjackson-bit](https://github.com/mrjackson-bit)

## PROFESSIONAL SUMMARY

---

Most people are either technical or creative. I stopped choosing a long time ago. With a BS in Digital Film Production, a UC Berkeley Full-Stack Web Development certificate, and hands-on experience building and deploying production web applications, I bring both the craft and the code to digital media work. I design with intention, build with precision, and manage projects the way a producer runs a set — on time, on brand, and with every stakeholder informed. Whether implementing a campaign-ready email template, managing a content calendar, or shipping a client-facing web build, I move fast without cutting corners.

## CORE SKILLS

---

**Web & Dev:** Next.js, React, TypeScript, Tailwind CSS, HTML/CSS, Vercel, GitHub, REST APIs

**Email & Campaign:** HTML email templates, responsive design, campaign asset creation, CTA architecture

**Creative Tools:** Figma, Adobe Suite, DaVinci Resolve, Ableton Live, Logic Pro X, CapCut

**Project Management:** End-to-end campaign coordination, cross-functional collaboration, deadline management, client communication

**Content & Media:** Long-form writing, copyediting, video production, audio post-production, social media asset creation

## EXPERIENCE

---

### Founder & Developer · Seth Shows Media

2023 – Present · Portland, OR (Remote)

- ▶ Built and deployed multiple production-grade web applications using Next.js, Tailwind CSS, and TypeScript — including a Claude API-powered Sync Brief Generator and a live market data dashboard integrating CoinGecko and Finnhub APIs.
- ▶ Designed and implemented sethshows.com as a standalone brand showcase site with a custom neon cyan/magenta/amber design system, developed from original logo assets.
- ▶ Manage all creative direction, brand strategy, content planning, and technical execution across web and social channels — functioning as a one-person agency.
- ▶ Produces CapCut-based product video content and manages affiliate marketing integration across tech accessory and creative software verticals.

### Co-Founder · Organic Mechanics

2022 – Present · Portland, OR

- ▶ Co-founded a sync music licensing venture bridging hip-hop/soul and rock/metal genres for film, TV, and advertising placements.
- ▶ Oversees all digital presence including web, campaign assets, and pitch materials — coordinating between music producers, licensing platforms, and media buyers.
- ▶ Built and deployed the Sync Brief Generator tool to streamline creative briefs for music supervisors — reducing turnaround time and improving placement specificity.

## Technical Specialist · Apple Inc.

Aug 2023 – Present · Washington Square / Pioneer Place, OR

- ▶ Serve as primary technical resource for all Apple product lines — delivering high-stakes customer consultations that require clear, confidence-inspiring communication of complex technical information.
- ▶ Developed an informal troubleshooting framework adopted team-wide and referenced in internal communications — demonstrating systems thinking and cross-team knowledge transfer.
- ▶ Recognized by customers as a de facto floor leader; frequently assumed to hold a management role based on presence, communication, and technical authority.
- ▶ Curate and facilitate peer education on macOS, iOS, and hardware diagnostics — a natural extension of a career-long commitment to teaching through doing.

## Bar & Restaurant Manager / Lead Bartender · Various Venues

2002 – 2023 · Oregon & California

- ▶ 20+ years of progressive leadership in high-volume hospitality — including floor management, team training, event production, and venue operations.
- ▶ Managed multi-channel guest communications including social content, event promotions, and email campaigns for venue marketing.
- ▶ Built and maintained client-facing systems for reservations, inventory, and staff scheduling — translating operational complexity into simple, repeatable workflows.

## EDUCATION & CREDENTIALS

---

### Full-Stack Web Development Certificate · UC Berkeley Extension / edX

2024 · Remote

*Next.js, React, Node.js, PostgreSQL, REST APIs, TypeScript, Tailwind CSS*

### BS, Digital Film Production · SAE Expression College

Emeryville, CA ·

*Audio post-production, sound design, visual storytelling, production management, editing*
